The Coravin System

Experience Fine Wines by the Glass

At The Chester Hotel, we're proud to offer an exceptional selection of premium wines served through our Coravin system. This revolutionary technology allows us to pour wines by the glass without removing the cork, preserving each bottle's quality and allowing you to enjoy rare vintages that would typically only be available by the bottle.

How Coravin Works: A fine, hollow needle pierces the foil and cork while argon gas (an inert, odourless preservative) gently pressurises the bottle. This allows wine to flow out while preventing oxidation. When the needle is removed, the cork naturally reseals itself, maintaining the remaining wine's freshness for weeks, months, or even years - just as if it were never opened.

For Full-Bodied Reds: Our Coravin Aerator instantly opens these wines, delivering the equivalent of 60-90 minutes of decanting in seconds. The result? Perfectly aerated, complex flavours in every glass.
